The main reason you should choose Fullscreen as your video player is that it does a fantastic job of playing a large number of videos fullscreen, although it does need some time to get accustomed to. Fullscreen YouTube offers very high bitrate with a resolution of 940x1920 at 30fps. This is much higher than most video players and YouTube's resolution is not only the most difficult resolution for Fullscreen to render fullscreen (we tested it the other day), but also the most expensive. The only solution I have found is a method for reducing the bitrate a bit More Video Resources - HD videos with the option to play at 1080p.. 8 / 8 Gravity Gravity 5 / 5 Jumanji Inception Jumanji Into Your Heart 5 / 5 Dope Don't Breathe Don't Breathe.
